A65003	Flash Bang 3.0 Enola Gaye	Vente libre	7.00 € incl. tax

A powerful distraction grenade that is loud and easy to deploy in the field.

The Flash 3.0 grenade is currently the largest distraction grenade available in the EG range for tactical use. It produces a low-frequency noise that, while loud, is not unpleasant. The 3.0 produces a significant white flash, ideal for low-light conditions. It features a top-pull igniter, allowing for easy deployment.

- **Start-up time:** 5 s (± 1.5 s)
- **Diameter:** 38 mm
- **Length:** 130 mm
- **Noise level:** 120 dB at 10 m
- **Total weight:** 110 g (± 15 g)
- **Active load:** 4.8 g
- **Safety distance:** 10 m
- **Biodegradability:** 99.5%
- **Ignition:** Top Pull system

Controlled and immersive sound effect

On the field, the **distraction grenade** plays a key role. Here, you benefit from a **deep boom** rather than a high-pitched crack, which improves user comfort while maintaining an effective psychological impact. Ideal for **airsoft** scenarios, **tactical simulations** , or training.

Top Pull Ignition System

Activation is via a **pull-cord igniter** . Simple, intuitive, and quick: pull, launch, and the 5-second delay allows time to move to safety. This type of mechanism is particularly appreciated for its **reliability** and **ease of use** .

Safety and field use

The design of the **Flash 3.0** limits risks: no flame upon explosion, and a body that remains manageable with **gloves** . However, it must be used exclusively **outdoors** , respecting a minimum distance of 10 meters and with **protective equipment** (goggles, gloves).

Eco-friendly design

An often overlooked but essential point: this grenade is **99.5% biodegradable** . Its clean composition reduces environmental impact, a real plus for regular pitches and organizers concerned about their footprint.

FAQ

Can the Flash 3.0 be used indoors?

No, this grenade is designed exclusively for outdoor use with the permission of the landowner.

How do I light the grenade?

Simply pull the pin firmly upwards using the Top Pull system, then throw the grenade immediately.

What is the noise level it produces?

The Flash 3.0 generates a sound level between 115 and 120 dB at a distance of 10 meters.
