OTF (Out The Front) knives extend the blade from the front.

This OTF automatic knife has a double-edged needle point blade mounted in a carbon handle. The end of the handle is equipped with a window breaker hammer. The knife comes with a Cordura sheath with a closure and belt loop.

What is a needle point blade?
Needle point blades have a symmetrical design with two edges that taper sharply from the handle to the tip. This unique shape enhances the blade's ability to pierce and penetrate different materials, making it an ideal choice for combat and self-defense.
