Progressive six-station press designed for intensive reloading.

The **Lee Six Pack Pro** is a **high-end, 6-station progressive press** designed for heavy-duty reloading of **pistol** and **rifle** cartridges. Compatible with all standard tools, it ensures speed, smooth operation, and stability.

- **Number of stations:** 6 independent stations
- **Indexing:** automatic, without adjustment or maintenance
- **Compatibility:** 7/8"x14 tools, all brands
- **Capacity:** Accepts the largest calibers, including Magnum type.
- **Case feeding:** automatic 5-tube feed + manual loading port
- **Priming:** automatic, all primer sizes
- **Dosing unit:** Auto Drum Deluxe included
- **Shell plate:** included depending on size
- **Tools:** 3 or 4 tools depending on the version

A high-efficiency 6-station progressive press

The **Six Pack Pro** is the most advanced progressive press in the Lee range. Thanks to its **6 automatic stations** , it allows for seamless chaining of operations: resizing, expansion, powder dosing, bullet placement, crimping... Each phase is optimized for a **smooth, fast and precise cycle** .

Two versions to suit your needs

The press is available as a kit depending on your type of ammunition:

- **Gun Kit:** three carbide tools (resizing, expanding/dosing, seating), + Auto Drum Deluxe dosing unit, shell plate, 5-tube automatic feed. The **Factory Crimp Die** is available as an option.
- **Rifle Kit:** complete tools: full recalibration, short powder measure, micrometric adjustment seating die, and **Factory Crimp Die included** .

Automatic socket feeding

The press is equipped with a **universal 5-tube magazine** , compatible with a wide range of calibers and optimized for necked cases. This system reduces handling time and increases reloading **productivity** .

Ergonomics and stability

Featuring **Breech Lock** technology, each tool can be quickly mounted/dismounted while retaining settings. The Auto Drum Deluxe provides **consistent, precisely adjustable powder distribution** .

Ready to use according to the chosen caliber

Each kit comes with **tools suited to the selected caliber** , a shell plate, powder measure, case feeder, and instructions with **reloading tables** . Simply add your components to get started immediately.

FAQ

What is the difference between a pistol kit and a rifle kit?

The rifle kit includes a Factory Crimp Die and a short measuring tool suitable for slow powders, unlike the pistol kit which requires the addition of the Crimp Die as an option.

Can I use tools from other brands?

Yes, the press accepts standard 7/8"x14 tpi tools, including those from major brands (RCBS, Lyman, Hornady...).

Is the caliber change quick?

Yes, thanks to the Breech Lock system, tool changes are quick. The shell plate and dispenser also need to be adjusted if the caliber changes.
