This specially formulated sealant is ideal for repairing or preventing leaks from occurring.

Ideal for O-rings and rubber seals.

The high viscosity compound provides excellent adhesion to further improve joint integrity.

Its rich silicone content also keeps the rubber components soft for longer life.

High viscosity airtight sealant

This grease is specially formulated to repair or prevent leaks due to faulty O-rings and rubber seals. The high viscosity compound provides excellent adhesion to further improve joint integrity.

Its rich silicone content also keeps rubber components soft for longer life. When applied to pressurized areas such as GBB mags, the grease penetrates and fills irregularities between valve seals to help mags maintain a full charge for a longer period of time.
