The Acro S-2 Aimpoint® adopts a compact design based on the 2nd generation of the Acro.

The model has been designed to be mounted on the ribs of ventilated rifles available on the market, versatility being one of its essential characteristics. Its large 9 MOA red dot simplifies shot viewing, improving automatic adjustment of oscillation and barrel positioning. The sleek optics have no protruding parts, providing an even clearer view. The low axis of the 15 mm optic allows correct mounting of the weapon.

The Acro S-2 excels in bird and small game hunting, as well as sporting applications.

- 50,000 hours (over 5 years) of operation on one battery
- Immersion up to 5 meters
- Weight: 68 g viewfinder only
- Versatile optic for all shotgun applications
- Very low integrated slide mount made of reinforced carbon fiber - interchangeable adapter plates included to fit most slide sizes (6-12mm)
- 15 mm (0.6 inch) height of the optical axis measured from the top surface of the mechanical interface
- 10 intensity settings with higher maximum setting in bright sky conditions
- Dot size 9 MOA
