The WML White/IR Gen 3 is designed to work in tandem with modern night vision equipment and is equipped with a 160mW infrared light that can operate for up to 2.5 hours.

The new generation of INFORCE weapon lights offers users even more brightness and power than before. INFORCE's WML White/IR Gen 3 more than doubles the beam intensity of its predecessor with a single CR123a battery, without compromising the 1.5 hour runtime. With a beam intensity of 10,000 candelas, the WML White/IR Gen 3 is incredibly bright and features a 400 lumen LED.

- 400 lumens in high mode
- Beam intensity of 10,000 candelas
- Distance of 656ft/200m
- 1.5 hour battery life with a single CR123a battery
- ¼ turn of the head engages lock mode for travel, transport and storage
- Safety lever minimizes accidental discharge
- Integrated clamp interfaces with MIL-STD-1913 rails

Its ergonomic, non-slip button, designed to fit the human thumb, replaces old switches and allows for intuitive activation and deactivation, while a toggle safety ensures that the device cannot be turned on until the user is ready.

Unlike other models that use cheaper plastic, INFORCE built the WML White/IR Gen 3 with reinforced nylon, making it impervious to debris like dirt or sand. Additionally, this model is waterproof up to 20 meters, ensuring reliable performance in all conditions. This lightweight and durable light is a testament to INFORCE's commitment to quality and reliability.
