Cold and layered bronzing of small steel parts (excluding barrels and breechblocks).

ARMISTOL Liquid Bronzafroid is specifically designed to blacken small parts of weapons and make cold touch-ups in one or two applications.

This tanning product is intended for small steel parts, such as triggers, screw heads, rear sights, front sights, and trigger guards. This product should not be used on barrels and slides.

Preliminary work: polish and degrease the part to be treated, then brush it after drying.

Instructions: Spread the product with a cotton pad on the warm part if possible. Let it dry for a few moments, then wipe the part with a wool cloth. Depending on the metal, apply the product several times.
