CAL002	Caldwell Matrix Shooting Stand	Vente libre	129.00 € incl. tax

The highly versatile Matrix combines great features and rock-solid stability in an affordable shooting support.

The central element of the design is the innovative, ultra-rigid U-frame that allows for quick length adjustment to perfectly fit any firearm. A convenient storage area incorporated behind the front rack features a removable cover that adds additional space for detachable magazines or bipod-equipped firearms when detached, and serves as a rubberized rear supporting surface for handguns that fire when left in place.

A spring-loaded tension mechanism and height adjustment wheel allow for quick, one-handed elevation adjustments without the front cradle wobbling throughout the entire vertical range. The over-molded front and rear rests protect the firearm's finish, but are firm enough to prevent play. The Matrix™ easily converts into a compact front rest by removing the rear portion of the frame. Whether used as a front rest or a full-length rest, the Matrix provides stability that maximizes your firearm's accuracy potential.
