Bounty Hunter Tracker IV Key Features:

Search modes :

- **All Metal Mode** : This mode detects all types of metals, whether ferrous or non-ferrous, without discrimination.
- **Disc Mode** : This mode filters out certain types of unwanted metals, such as iron, to focus on more valuable metals.
- **Discrimination Tone Mode** : This is a variation of Disc mode that uses different tones to indicate the nature of the metal being detected.

Adjustable Sensitivity : The Tracker IV features a sensitivity adjustment control, allowing you to adjust the detection depth based on ground conditions.

Search Coil : It is equipped with an 8-inch waterproof coil, allowing you to detect objects in shallow water, such as at the beach or in streams.

Depth Indicator : Although basic, it provides a rough indication of the depth of the detected object.

Rugged Construction : The Bounty Hunter Tracker IV is built to withstand outdoor use, with a strong and durable structure.
