- Openwork relaxation
- Extended rear safety pedal
- Openwork hammer
- Operation: single action (SA)
- Slide with front and rear grip grooves

The ZIG M1911 is a clone of the 1911 Government, taking its original lines with, however, multiple developments.

It is equipped with an adjustable rear sight, with a dovetail mounting, an extended "beaver tail" safety pedal, for a better grip, grip grooves at the front and rear of the breech, facilitating loading and unloading maneuvers.

Its G10 plates and the textured machining of the handle provide a safe and effective grip on the weapon.

Its lower Picatinny rail allows the mounting of a laser or lamp.

With internals compatible with COLT 70 Series parts, the ZIG 1911 provides an excellent foundation for performance enhancements and customization.
