- **Seat diameter:** 37.5 cm (55) / 40 cm (65 & 75)
- **Weight:** 890 g (55) / 960 g (65) / 1030 g (75)
- **Maximum load:** 225 kg (55) / 250 kg (65 & 75)
- **Structure:** High-quality aluminum
- **Tips:** Large TPE feet
- **Color:** Black
- **Made** in Sweden
- **Warranty:** 2 years

Truly premium comfort

The **Walkstool Comfort** stands out thanks to its **wide, breathable mesh seat** . The higher the model, the more generous the seating area. The result: enhanced stability and noticeable comfort, even during extended use. You sit down... and you immediately feel the difference.

Dual usable height

Thanks to its telescopic system, it offers **two seating positions** : a low position without extending the legs and a high position with full extension. This flexibility allows you to adapt your posture to the activity, whether it's driven hunts, hunting from a hide, working on a construction site, or doing photojournalism.

Exceptional strength and high-quality aluminum

Its **high-grade aluminum** frame offers a remarkable strength-to-weight ratio. With a weight capacity of up to **250 kg** , it ranks among the most robust tripod chairs on the market. Designed to withstand demanding environments-humidity, cold, and rough terrain-it will accompany the user season after season.

Large TPE feet for difficult terrain

The **wide TPE feet** improve stability and limit sinking into soft ground. Whether in the forest, on wet meadows, or on sandy soil, the footing remains secure and stable.

Ultra portable despite its performance

When folded, it remains compact (41 to 51 cm depending on the version) and is easily transported in a bag or in a car trunk. Weighing in at just **890 grams** , it combines mobility and sturdiness without compromise.

A seat for all situations

Whether **hunting** or **fishing** , it allows you to stay comfortably in position. On construction sites, it reduces back and knee strain. At events or while traveling, it eliminates the need for prolonged standing. Even in extreme weather conditions-heat, snow, or humidity-it maintains its performance.

FAQ

Which size should I choose: 55, 65, or 75 cm?

The choice depends on your height and intended use. The 55 cm model prioritizes compactness, the 65 cm model offers an excellent compromise, and the 75 cm model is suitable for users seeking a high position and maximum seating capacity.

Can it be used on soft ground?

Yes, thanks to its large TPE feet, it offers better stability and limits sinking on soft surfaces such as grass, soil or sand.

Is it suitable for intensive professional use?

Yes, the Walkstool Comfort range is designed for frequent and professional use, with a reinforced structure and a capacity of up to 250 kg.
