Enhance your nighttime games with high-precision, eco-friendly tracer balls.

BLS biodegradable tracer BBs are designed for demanding airsoft players who want to combine performance and respect for the environment. Made of biodegradable PLA, they decompose naturally, thus reducing the ecological impact. Their diameter of 5.95 mm with a tolerance of ±0.01 mm ensures a smooth feed and a stable trajectory, ideal for high-rate replicas. The green color of the BBs allows optimal visibility during shots, facilitating the monitoring of the trajectory.

Technical characteristics:

- **Weight** : 0.20g to 0.28g
- **Caliber**: 6mm airsoft
- **Material** : Green plastic
- **Quantity** : 5000 balls
- **Packaging** : 1 kg resealable bag

Tracer Beads for an Unparalleled Nighttime Experience

BLS BIO Green Tracer BBs are specially designed for airsoft games in low-light or nighttime conditions. Thanks to their phosphorescent coating, they light up when fired, providing optimal visibility of the trajectory. This feature not only improves accuracy, but also adds a spectacular visual dimension to your games.

Eco-responsible Manufacturing

Made from **PLA (polylactic acid)** , a biodegradable polymer derived from natural resources like corn starch, these beads decompose naturally without harming the environment. They are an eco-friendly alternative to traditional plastic beads, addressing growing concerns about sustainability and environmental impact.

Compatibility and Performance

With a precise diameter of **5.95 mm ± 0.01 mm** , these BBs ensure perfect compatibility with replicas equipped with tracer devices, such as tracer silencers or special hop-up chambers. Their weight of **0.20 g** is ideal for replicas displaying an energy between 1.5 and 1.9 joules, offering a perfect balance between range and accuracy.

Instructions for Use

To fully benefit from the tracer effect, it is recommended to use these pellets with a tracer device that will activate their green luminescence when fired. If you do not have such a device, you can expose the pellets to a light source before use to temporarily activate their phosphorescence. Store the pellets in a dry place away from light to preserve their properties.

Why Choose BLS BIO Green Tracer Beads?

- **Superior Quality** : Impeccable finish and strict dimensional tolerance for optimal performance.
- **Respect for the Environment** : Made from biodegradable materials reducing the ecological impact.
- **Enhanced Gaming Experience** : Visible light path for immersive nighttime gaming.
- **Wide Compatibility** : Suitable for a wide range of replicas equipped with tracer devices.
