SKU	Designation	French Law	Caliber	Weight (g)	Pack.	Colors	MSRP
BB2021	0.20g BLS tracer green - 1kg bag	Vente libre	6 mm airsoft	0.2	5000	Green	29.00 € incl. tax
BB2022	0.20g BLS trace red - 1kg bag	Vente libre	6 mm airsoft	0.2	5000	Red	45.00 € incl. tax
BB2023	0.25g BLS tracer green - 1kg bag	Vente libre	6 mm airsoft	0.25	4000	Green	30.00 € incl. tax
BB2024	0.25 BLS trace red - 1kg bag	Vente libre	6 mm airsoft	0.25	4000	Red	46.00 € incl. tax
BB2032	0.28g BLS tracer green - 1kg bag	Vente libre	6 mm airsoft	0.28	3571	Green	33.90 € incl. tax
BB2034	0.25g BLS tracer blue - 1kg bag	Vente libre	6 mm airsoft	0.25	4000	Blue	38.00 € incl. tax
BB2035	0.28g BLS tracer blue - 1kg bag	Vente libre	6 mm airsoft	0.28	3571	Blue	39.00 € incl. tax
PCKBB2021	Box of 20 bags 1kg BLS tracer 0.20g green	Vente libre	6 mm airsoft	0.2	100000	Green	479.00 € incl. tax
PCKBB2022	Box of 20 bags 1kg BLS tracer 0.20g red	Vente libre	6 mm airsoft	0.2	100000	Red	749.00 € incl. tax
PCKBB2023	Box of 20 bags 1kg BLS tracer 0.25g green	Vente libre	6 mm airsoft	0.25	80000	Green	499.00 € incl. tax
PCKBB2024	Box of 20 bags 1kg BLS tracer 0.25g red	Vente libre	6 mm airsoft	0.25	80000	Red	~~999.00 € incl. tax~~ 799.20 € incl. tax
PCKBB2032	Box of 20 bags 1kg BLS tracer 0.28g green	Vente libre	6 mm airsoft	0.28	71428	Green	560.00 € incl. tax

High-precision tracer balls for visualizing trajectories during airsoft games.

BLS Precision 6mm tracer BBs are designed for airsoft players who want to visualize their shot trajectories with a compatible tracer device. Their **5.95mm diameter with a tolerance of ±0.01mm** ensures excellent dimensional consistency. Available in **0.20g, 0.25g, and 0.28g** , these white BBs are packaged in **1kg resealable bags** , also available in cartons of 20 bags (20kg).

- **Brand:** BLS Precision
- **Type:** tracer airsoft BBs
- **Caliber:** 6 mm Airsoft
- **Outer diameter:** 5.95 mm
- **Dimensional tolerance:** ± 0.01 mm
- **Available weights:** 0.20 g, 0.25 g and 0.28 g
- **Color:** white
- **plot function:** yes
- **Unit packaging:** 1 kg bag
- **Cardboard packaging:** 20 bags of 1 kg
- **Total weight of the carton:** 20 kg
- **Closure:** resealable zip
- **Accessory needed for the lighting effect:** compatible airsoft tracer

Tracer pellets to visualize shots in airsoft

BLS Precision 6mm tracer BBs allow you to visually track the trajectory of projectiles when used with a **compatible airsoft tracer** . This device illuminates the BBs as they pass, producing a bright effect that is particularly visible in dark environments.

This technology is particularly useful during night games, CQB sessions, and training on dimly lit fields. It allows players to more easily observe the direction of their shots and adjust their settings.

High-precision manufacturing with a tolerance of ± 0.01 mm

Dimensional consistency is one of **BLS Precision** 's strengths. These balls have an **outside diameter of 5.95 mm** with a **stated tolerance of ± 0.01 mm** , i.e. a dimensional range between 5.94 and 5.96 mm.

This precision contributes to consistent feeding and uniform behavior within the barrel. It is particularly beneficial for players using replicas equipped with **precision barrels** , provided it complies with the manufacturer's recommendations.

Three weights for different airsoft configurations

The range is available in **0.20g, 0.25g and 0.28g** . Each weight allows you to adapt the behavior of the BBs to the characteristics of the replica and the playing conditions.

- **0.20 g:** a light weight commonly used with moderately powered replicas.
- **0.25 g:** a versatile weight offering a compromise between speed and trajectory stability.
- **0.28 g:** a heavier weight, appreciated for its better resistance to external disturbances when the settings are adapted.

Each pack contains a single weight. The choice depends in particular on the power of the replica, the hop-up setting, and the conditions of use.

A 1 kg resealable zip-lock bag

The marbles are packaged in **1 kg bags** , equipped with a **quick-release zip closure** . This system facilitates opening and closing the packaging between uses, while limiting the marbles' exposure to dust.

For professionals, associations and airsoft fields, a **carton of 20 bags** is also available, representing a total weight of **20 kg** .

Approximate number of marbles per bag

The number of marbles depends on the selected weight. For a bag containing 1 kg of marbles, the theoretical quantities are as follows:

- **0.20 g:** approximately 5,000 marbles
- **0.25 g:** approximately 4,000 marbles
- **0.28 g:** approximately 3,571 marbles

These quantities are calculated on the basis of a net mass of 1 kg of marbles, excluding packaging.

FAQ

Do you need a tracer to use BLS Precision tracer balls?

Yes, a compatible airsoft tracer device is required to activate their light effect. Without this accessory, the BBs will not produce a visible light trail.

What weights are available for these tracer balls?

BLS Precision tracer balls are available in three weights: 0.20 g, 0.25 g and 0.28 g. Each 1 kg bag contains only one weight.

How many sachets are in a carton of tracer marbles?

One carton contains 20 bags of 1 kg, for a total of 20 kg of airsoft tracer pellets.
