Master your dog's tracking and training with the CANICOM GPS 2, a 2-in-1 system combining precision and performance.

The NUM'AXES CANICOM GPS 2 is an innovative device that combines GPS tracking and long-range training functions. Equipped with the latest generation of GPS/GALILEO modules, it offers exceptionally accurate real-time tracking. The optimized electronic compass ensures increased responsiveness, effectively guiding the handler to their dog.

This system also includes a training function (blocking possible) with a range of up to 3 km, allowing you to recall or correct your dog remotely. High-brightness LEDs can be activated on the collar to enhance safety, especially in low-visibility conditions.

The CANICOM GPS mobile application, available for iOS and Android, offers an optimized user interface, making it easier to track and control your pet.

The CANICOM GPS 2 is the ideal choice for dog owners who want to combine precise tracking with effective training. Thanks to its advanced technology, this system allows you to track your dog's movements in real time, while also offering long-range training features. Compatibility with CANICOM GPS and CANICOM GPS 2 collars allows you to manage up to **20 dogs** simultaneously. The dedicated mobile app offers detailed mapping, personalized alerts, and the ability to create virtual fences, ensuring complete control over your pet's environment.
