Perfect your black powder shooting with the Lee Precision 500-354-M mold, designed to produce .50 caliber Minié bullets of unmatched accuracy.

The Lee Precision 500-354-M single cavity mold is used to cast .50 caliber Minié bullets, .500 inch diameter and 354 grains in weight. Made of aluminum, it provides rapid heat-up and rust resistance, facilitating the production of high quality projectiles.

The Lee Precision 500-354-M Bullet Mold is specifically designed for the black powder shooting enthusiast who wants to produce their own .50 caliber projectiles. The mold's aluminum design allows for rapid heat-up and increased rust resistance, ensuring long life and ease of use.

The Minié bullet produced by this mold has a diameter of .500 inch and a weight of 354 grains, providing excellent accuracy and clean impacts on the target. The modern design of the Minié bullet ensures optimum stability when shooting, thus improving the overall performance of the shooter.

The mold is equipped with an ergonomic wooden handle, facilitating its handling and reducing fatigue during prolonged molding sessions. In addition, the automatic central pin system ensures perfect alignment of the core, simplifying the molding process and guaranteeing uniform projectiles.
