LE731	REAL .45 2 Cavity Bullet Mold #90390	Vente libre	.45 BP	Truncated Cone (TC)	0.45	200	69.00 € incl. tax

Conical bullet mold intended for reloading black powder weapons.

The REAL 2-cavity bullet mold in .45 caliber, weighing 200 grains, is designed to produce high-quality projectiles for muzzleloaders. Ideal for traditional shooting enthusiasts, this tool ensures fast and consistent production of bullets, combining performance and durability.

The Lee Precision REAL (Rifling Engaged At Loading) 2-cavity bullet mold is specifically designed for muzzleloading shooting, a discipline appreciated by traditional and historical shooting enthusiasts. This mold creates .45 caliber bullets weighing 200 grains, ideal for black powder weapons.

Thanks to its innovative "REAL" design, this mold ensures optimal engagement of the rifling during loading, improving accuracy and reducing the need for excessive lubrication. Made from high-quality aluminum alloy, it guarantees rapid heating, extended service life and ease of use.

The handles of this mold are not included, but can be added separately for a comfortable and stable grip. With its two cavities, it allows for faster production compared to single-cavity models, while ensuring perfect homogeneity of your projectiles.

This mold is a must-have choice for reloading enthusiasts looking to obtain reliable, high-performance ammunition while reducing manufacturing costs.
