Lyman External Chamfering Tool

The Lyman External Chamfer Tool is designed to remove excess brass from freshly shortened cases, ensuring a smooth, even finish. Suitable for cartridges from .17 to .45 caliber, it is the perfect complement to Lyman's VLD Internal Chamfer Tool for optimum case preparation.

When shortening cases, burrs may form on the outside of the collar, affecting reload quality and shooting accuracy.

The Lyman External Chamfer Tool is specifically designed to remove these burrs, ensuring a smooth, uniform surface. Its compatibility with a wide range of calibers, from .17 to .45, makes it a versatile tool for any reloader.

Made from high quality hardened steel, it guarantees long life and consistent performance. For complete case preparation, it is recommended to use this tool in conjunction with Lyman's VLD internal chamfering tool, ensuring a perfect finish both inside and outside the case neck.

Technical characteristics:

- **Compatibility** : Fits cartridges from .17 to .45 caliber.
- **Function** : Deburrs the exterior of case collars for a smooth, uniform finish.
- **Material** : High quality hardened steel for increased durability.
- **Ergonomics** : Manual design for easy and precise use.
