Optimize your reloading with Lyman Brass Smith Case Trim Xpress™ bushings, designed for precise and efficient trimming of your long gun cases.

Lyman Brass Smith Case Trim Xpress™ bushings are essential for reloaders looking for speed and accuracy. Designed to fit necked cases, they provide a clean cut using the shoulder of the case for centering, eliminating the need for pilots. When used with the Case Trim Xpress™, they ensure optimum preparation of your ammunition.

Lyman Brass Smith Case Trim Xpress™ Bushings are designed to improve the efficiency of the reloading process. By attaching to the shoulder of necked cases, these bushings provide perfect centering during trimming, ensuring consistent case length.

Made from durable hardened steel, they stand up to heavy and prolonged use. Each ring is calibrated to specific dimensions, ensuring optimum compatibility with a variety of popular calibers. Using these rings with Lyman's **Case Trim Xpress™** allows for a cutting rate of approximately 15 cases per minute, while maintaining exceptional accuracy.

This combination eliminates the need for additional pilots, simplifying the reloading process and reducing ammunition preparation time. For reloaders who care about quality and performance, Lyman Brass Smith Case Trim Xpress™ bushings are a wise investment, providing a reliable and efficient solution for case preparation.
