Ensures a lasting hold for your feathers and vanes!

Specially formulated to provide **exceptional adhesion** to carbon, aluminum and wood, it guarantees a strong and durable fixation, essential for optimal performance in archery.

- **Capacity** : 3/4 oz (approximately 21 grams)
- **Adhesive Type** : Solvent Based Glue
- **Drying time** : Initial drying in 5 minutes, complete drying in 48 hours
- **Compatibility** : Suitable for natural feathers and plastic vanes
- **Use** : Ideal for carbon, aluminum and wood drums

Reliable and Durable Adhesion

Bohning Platinum Fletch-Tite is designed to create a strong bond between the vanes and the shaft of the arrow. Its solvent-based formula penetrates lightly into the materials, ensuring a strong bond that withstands the most demanding shooting conditions.

Extended Compatibility

Whether you're using natural feathers or plastic vanes, this glue offers optimum compatibility. It's particularly effective on carbon, aluminum and wood shafts, making it a versatile choice for all types of arrows.

Easy Application

Equipped with a precise applicator tip, the 3/4 oz bottle allows for controlled application of glue, reducing the risk of overflow and ensuring a clean installation of your fletching. The initial 5 minute dry time provides plenty of room to adjust feathers or vanes before the glue sets.

Resistance to Climatic Conditions

Once fully cured, after approximately 48 hours, the adhesive bond is resistant to temperature variations and humidity, ensuring that your tails remain securely in place regardless of weather conditions.

Why Choose Bohning Platinum Fletch-Tite Glue?

- **Reliability** : A grip proven by generations of archers.
- **Versatility** : Compatible with a wide range of barrel and tail materials.
- **Ease of Use** : Precise application and drying time adapted to adjustments.
- **Durability** : Withstands varied weather conditions for consistent performance.
