<https://europarm.fr/en/produit-20344-NUM-AXES-CANIFUGUE-FUG1034-wireless-anti-escape-system-Wireless-terminal-collar>

**NUM'axes**

SKU	Désignation	French Law	MSRP
NUM241	Num'Axes Canifugue FUG1034 (Terminal + collar)	Vente libre	299.00 € incl. tax

**Prevents your dog from running away and protects sensitive areas, all wireless for easy installation.**

### The CANIFUGUE FUG1034 Wireless Anti-Escape System

The terminal emits a signal delimiting the authorized zone. It has two functions: anti-escape fence or no-go zone. When the dog equipped with the collar approaches the boundary, it receives an audible or vibrating warning, followed by stimulation if necessary.

- **Wireless installation**
- **Powered base**
- **Adjustable coverage area**
- **Rechargeable collar**
- **8 stimulation levels**
- **Expandable**
- **Portability**

#### Main features

- **Wireless Installation** : No wiring required, quick and hassle-free setup.
- **Portability** : Compact and lightweight design, ideal for travel and vacations.
- **Operating modes** :
  - *Anti-escape* : Defines a secure area where your dog can move freely.
  - *Area protection* : Prohibits access to certain specific areas such as the vegetable garden or flower beds.
- **Adjustable Coverage Area** : Adjustable radius from 2 to 120 meters to accommodate different space configurations.

- **Rechargeable collar** : Quick charge in 1 hour, with 8 stimulation levels and a no-stimulation mode for optimal adaptation to your dog's temperament.
- **Expandability** : Ability to add unlimited additional collars and terminals to cover larger or multiple areas.

#### Benefits

- **Increased security** : Prevents escapes and protects your dog from outside dangers.
- **Flexibility of use** : Suitable for both outdoor and indoor use to restrict access to certain rooms.
- **Easy to carry** : Easily take it with you when you travel to maintain your dog's habits.

#### **How does the CANIFUGUE FUG1034 wireless anti-escape system work?**

The terminal emits a circular signal delimiting the authorized zone. When the dog equipped with the collar approaches the limit, it receives an audible or vibrating warning, followed by stimulation if necessary.

#### **Can multiple collars be used with one terminal?**

Yes, one station can handle an unlimited number of collars, which is ideal for households with multiple dogs.

#### **Does the terminal need to be permanently connected?**

The terminal can operate on mains or batteries, offering flexibility depending on your needs.

#### **What is the battery life of the collar?**

The collar offers a battery life of approximately 14 days depending on use and fully recharges in 1 hour.

#### **Is the system suitable for all types of dogs?**

Yes, thanks to the 8 stimulation levels and the no stimulation mode, the system adapts to the different sizes and sensitivities of dogs.

#### Care instructions

- **Collar** : Clean the electrodes regularly with a damp cloth to ensure optimal contact.
- **Terminal** : Periodically check the battery level if it is not plugged into the mains and replace them if necessary.
- **General** : Inspect the entire system for signs of wear or damage and ensure that components are installed correctly.
