Bright optics designed for hunting from a blind or in the marsh.

The **WALDBERG 9x63** is a scope designed for **waterfowl hunting** . Its large objective lens and precise adjustment guarantee optimal visibility in low-light conditions.

- **Magnification:** 9x
- **Objective:** 63 mm
- **Tube diameter:** 30 mm
- **Adjustment:** 1 click = 1/4 MOA
- **Diopter correction ring:** yes
- **Length:** 38 cm
- **Weight:** 787 g

A scope designed for the hunting blind

The **WALDBERG 9x63** was specifically developed for **waterfowl hunters** operating in **wetlands** : blinds, marshes, lakes, or plains. Its large **63mm objective lens** captures maximum light, providing a clear image even at the very beginning or end of the day - the key moments for observing and shooting game.

A sharp image, without lag

The precision adjustments (1 click = 1/4 MOA) ensure rapid adaptation in the field, even in changing conditions.

- **30 mm tube:** better transmission and increased robustness

Balance, comfort, reliability

Its **weight of 787 g** provides good stability without adding unnecessary weight to the rifle. The 38 cm format integrates perfectly on a hunting rifle equipped with 30 mm scope rings. The **precise adjustment** and **image clarity** make this scope equally effective for short/medium-range shooting

and for extended observation from a blind.

Easy care for long-lasting use

After each outing, it is recommended to clean the lenses with a **microfiber cloth** and **store the glasses in a case** to prevent exposure to moisture and dust. This prolongs their lifespan, even with intensive use.

FAQ

Is this scope suitable for waterfowl hunting in wet conditions?

Yes, its 63mm lens and robust design offer excellent performance in marshland or from a blind, even in low light.

What type of mounting is required for this scope?

The 30mm tube is compatible with the majority of mounting rings for hunting optics.

Is the magnification fixed or variable?

The magnification is fixed at 9x, perfect for observing at medium distances without complex adjustments.
