Export-only kit to increase the power of Macavity PCP rifles

Export kit including a spring to replace the original spring of the Macavity PCP rifle and thus increase its power. Note that the increase in power increases the amount of compressed air used for each shot.

- Each kit is specific to a caliber:
  - 4.5mm => 20 joules
  - 5.5mm => 40 joules
  - 6.35mm => 60 joules
  - 7.65mm => 110 joules

The kit itself is available over the counter as a category D, but in France, mounting it on a rifle changes the category of the rifle.

Les prix de vente conseillés sont mentionnés à titre indicatif. Les armuriers sont libres de vendre au prix qu'ils souhaitent. Textes et photos non contractuels, sujet à modification.
