Stylish and high-performance Hi-Capa 5.1 GBB airsoft pistol: balance between competition responsiveness and field ergonomics.

GBB Hi-Capa 5.1 Lancer Tactical replica with purple/gold aesthetics, designed for players looking for a **customizable** platform and optimized grip for dynamic shooting.

- **Operation:** Gas Blowback (GBB)
- **Slide:** CNC machined aluminum with hexagonal cutouts for aesthetics and grip
- **Frame:** Injection-molded polymer with anti-slip *stippling*
- **Compatibility:** Tokyo Marui Hi-Capa 5.1 parts (wide range of upgrades)
- **Test patterns:** integrated front and rear optical fibers
- **Magwell:** flared for faster reloading
- **Relaxation:** skeletal competition style, lightweight running
- **Safety:** Ambidextrous lever with functional beaver tail
- **Rail:** Lower Picatinny rail for lamp/laser
- **Magazine:** 28 rounds gas
- **Performance:** 300-330 FPS with 0.20g BBs (depending on gas and settings)
- **Thread:** 11mm CCW barrel (compatible with silencer/tracer adapters)

The **Stryk Hi-Capa 5.1 Violet/Gold** focuses on balance: a **CNC-cut slide** to lighten the cycle, a **textured frame** for control, and "competition" elements (magwell, skeletonized trigger) for quick handling.

Ergonomics & feel

The pistol feels instantly comfortable thanks to the pronounced stippling and flared magwell-ideal for pressure reloading. The competition-style trigger pull reduces travel for a crisp, repeatable

break, while the **blowback** provides a realistic recoil sensation suitable for dynamic shooting.

Compatibility & scalability

Based on the **Tokyo Marui Hi-Capa 5.1** standard, the replica accepts a wide range of internal and external parts: magazines, springs, TM-compatible gearbox parts (for Hi-Capa-specific components), sights, and trigger systems. The **11mm CCW threading** facilitates the addition of audio/visual accessories via adapter.

Usage & settings

Expect approximately **300-330 FPS** with 0.20g BBs, depending on the type of gas and temperature. For optimal durability: clean the barrel regularly, moderately lubricate the seals and nozzle, and use gases recommended for GBBs (Green Gas or a suitable equivalent).

Security & Compliance

Sale to adults only (18+). Comply with local regulations (possible power limit ? 2 J in Europe) and wear approved eye protection at all times.

FAQ

What type of gas should I use?
Use **Green Gas** or a gas recommended for GBB; avoid unknown mixtures and follow the manufacturer's advice to preserve the seals.

Does the replica accept Tokyo Marui Hi-Capa 5.1 parts?
Yes - compatibility with **Tokyo Marui Hi-Capa 5.1** parts allows for extensive customization (magazines, specific Hi-Capa external and internal upgrades).

Can a silencer be fitted?
The barrel has an **11mm CCW thread** ; most silencers/tracers can be fitted via an 11?14mm adapter if required.

What charger capacity?
Standard gas magazine: **28 rounds** (to be verified according to magazine model and manufacturer).

What does "openwork slide" mean?
The cutouts reduce moving mass for a faster cycle and provide a distinct visual identity; they also offer support points (hexagonal cutouts) facilitating slide handling.
