Optimize your night games with high-precision tracer balls.

BLS tracer pellets are designed for airsoft players looking for optimal performance during low-light games. Made of high-quality plastic, they offer excellent shooting consistency. Their 5.95 mm diameter with a tolerance of ± 0.01 mm ensures smooth feeding and a stable trajectory, ideal for high-rate replicas. The white color of the pellets allows for optimal visibility during shots, making it easier to follow the trajectory.
