Full frame version with compensator and 5" bull barrel for smooth and stable sport shooting.

- 5" Forged and Chrome Plated Steel Bull Barrel
- Full Frame housing with mounting rail for lamp or laser
- Compensator integrated into the cylinder head
- Removable trigger with different profiles provided
- RMR compatible "Optic ready" weapon
- Enlarged magazine release button and slide catch
- Ambidextrous safety lever
- Gripping grooves on the front and rear of the slide
- Machined Picatinny rail under the frame for adding a lamp or laser
- Elongated beaver tail
- Non-slip textured grip
- Simple Action
- Rear sight and front sight on dovetail
- Comes in a case with two 17-shot magazines, a can of Flunatec degreaser and a can of Flunatec lubricant.

The top-of-the-line version of the 2011, the **Tisas Duty Bull Barrel COMP 9x19** combines robustness, precision, and shooting comfort. Designed for range performance, it impresses with its balance, smooth mechanics, and Optic Ready compatibility.

Ergonomics and handling

The **Tisas 2011 Duty Bull Barrel COMP pistol** features a full-frame receiver with an integrated Picatinny rail, ensuring excellent stability and the ability to mount a light or laser. The textured polymer grip ensures a firm and comfortable hold, even during long range sessions.

Performance and precision

Its 5" chrome-plated forged steel **bull barrel** increases rigidity and reduces vibration, providing consistent groupings. The integration of a **compensator** limits barrel lift, allowing for fast and controlled sequences.

Optic Ready compatibility

Designed to evolve with the needs of shooters, this model is **optic ready** and compatible with RMR-type micro-red dots, for faster and more intuitive aiming.

Expanded controls and security

Controls like the slide catch and magazine release button are enlarged, making handling smoother. The ambidextrous safety lever and elongated beavertail enhance safety and shooting comfort. The flared magazine well facilitates reloading maneuvers, a major advantage for TSV use, for example.

Accessories included

Each model comes in a case with two 17-round magazines, a can of degreaser, and a can of Flunatec lubricant for immediate and optimal maintenance. The 2011 models use "Double Stack" magazines, a double-stack arrangement of cartridges to increase ammunition capacity.

Technical explanation – Bull Barrel

The **bull barrel** is a thicker barrel than standard barrels, eliminating the need for muzzle bushing. This design increases accuracy, reduces vibration, and improves the gun's longevity.

Technical explanation – Forged carbon steel

Forged carbon steel combines strength and durability. Forged under pressure, it provides a dense and homogeneous internal structure, reducing mechanical wear and ensuring better firing consistency.

Technical explanation – Compensator

The **compensator** is integrated into the breech. It redirects some of the gases upward to counteract the barrel's rise. The result is better stability and a faster rate of fire.

- **line of sight:** 153.1 mm
- **removable trigger:** interchangeable profiles
- **Sight:** front fiber optic / black notched rear sight
- **gripping ridges:** front and back
- **beaver tail:** elongated
- **trigger guard:** textured straight
- **chargers:** double battery chrome finish
