The world's first serially produced PPSh-41 GBBR

The PPSh-41 is one of the most iconic submachine guns of World War II. However, until now, commercially available PPSh-41s were only available in AEG versions. To meet the expectations of many GBB system collectors, VFC launched the long-awaited GBB version in 2025, combining VFC's legendary attention to detail and quality with realistic operational performance.

Features:

- Materials: metal, real wood stock, aluminum alloy, steel
- Drum Magazine Capacity: 120 BBs
- Total length: 843 mm
- Internal barrel length: 208 mm
- Weight with charger: 4200 g
- System: Blowback Gas
- Hop-Up: Adjustable

The PPSh-41 GBBR with the most accurate and complete details

This replica is inspired by the iconic PPSh-41 model. With its all-steel frame, wooden stock, and simulated steel stamping process, the surface treatment captures all the details of the original weapon. The VFC PPSh-41 GBBR is undoubtedly the most detailed and accomplished model on the airsoft market.

Newly designed GBB drum magazine with separate gas reservoir system

This GBB system features an innovative design that separates the BB loading from the gas reservoir. This allows for a more realistic magazine change thanks to dedicated plastic magazines.

In addition, the large-capacity gas reservoir, located inside the drum magazine, ensures a constant and powerful gas flow, for more stable and reliable firepower.

Easy HOP-UP adjustment

To allow users to directly adjust the HOP-UP system on the airsoft battlefield, we have developed a simplified adjustment method. The HOP-UP system can be adjusted directly on the PPSh-41 body, without having to open the slide or receiver cover. A simple 2 mm Allen key is all that is needed to modify the HOP-UP system on the fly!

Full CNC aluminum bolt for exceptional rate of fire experience

Equipped with a precision CNC-machined aircraft-grade aluminum slide, directly from the VFC, no additional upgrades are required. This model offers a rate of fire comparable to that of a PPSh-41 submachine gun, allowing you to unleash significant firepower in record time. Dominate the battlefield with unmatched performance and gain the advantage in every skirmish!

All-steel hidden fire control

All-steel fire control system: Built to last, with a realistic concealed design The all-steel selector components and fire control system are combined with an internally replicated concealed mechanism, providing not only increased durability but also a level of realism that leaves other brands far behind.
