PG1139	GBB Pit Viper Golden Eagle Replica	Vente libre	25	22	920	Gas	159.00 € incl. tax

GBB Hi-Capa inspired by the John Wick films: skeletonized slide, threaded bronze barrel and 30-round magazine.

Gas Blowback Hi-Capa replica with an aggressive look, designed for players wanting racing aesthetics and technical compatibility.

- **Operation** : Gas Blowback (GBB).
- **Internal barrel** : 113 mm Ø 6.02 mm.
- **Construction** : metal cylinder head / polymer body for robustness and lightness.
- **Modes** : Safe / Semi-automatic.
- **Hop-Up** : adjustable to optimize accuracy.
- **Magazine capacity** : 30 BBs.
- **External barrel** : 11 mm CCW threaded, bronze finish (compensator/adapter available).
- **Ergonomics** : textured stippled grip, flared magazine well, large magazine release.
- **Sighting** : fiber optic front sight (green).
- **Included** : molded ABS case and speedloader.
- **Compatibility** : many Tokyo Marui Hi-Capa parts are compatible.

The Pit Viper Golden Eagle is a GBB replica inspired by the Hi-Capa platform, designed to offer a strong visual presence while remaining a reliable base for customization and upgrades.

Construction and finishing

The replica combines a **ported metal slide** and a stippled **polymer body** for a good compromise between feel and weight. The 11mm CCW threaded **bronze outer barrel** allows for the installation of a compensator or suppressor via an adapter. Aesthetic details such as the slide openings and the copper finish enhance its visual identity while remaining functional.

Performance and precision

Equipped with a **113mm (6.02mm) inner barrel** and an **adjustable hop-up** , the Pit Viper is designed for stable trajectory and increased accuracy at medium range. The gas blowback system delivers a realistic recoil suitable for CQB and outdoor recreational games.

Ergonomics and ease of use

The textured grip ensures excellent handling, while the flared magazine well and oversized magazine release facilitate rapid reloads. The 30-round magazine reduces reload frequency, and the included case protects the replica during transport.

Interview and recommendations

To maintain reliability and longevity: regularly lubricate the bolt and seals, check the valve seals, use a lubricating gas appropriate for the temperature, and clean the inner barrel after heavy use. Verify the compatibility of Hi-Capa upgrades before installation to avoid friction or premature wear.

Inspired by the John Wick universe

The **Golden Eagle Pit Viper Hi-Capa** is inspired by the **TTI Pit Viper** seen in the fourth **John Wick** film where the famous professional killer, played by **Keanu Reeves** , confronts a horde of enemies in the heart of Paris.

FAQ - Questions/Answers

Is the replica delivered ready to use?

The replica is supplied in a case with a 30 BB magazine and a speedloader; you will need to provide GBB compatible gas and BBs for operation.

Does the threaded barrel accept accessories?

Yes, the outer barrel is threaded 11 mm CCW; an adapter may be required depending on the compensator or silencer model chosen.

Which Hi-Capa parts are compatible?

Many Tokyo Marui Hi-Capa parts are compatible (inner barrels, springs, valves, magazines); always check the exact part number before purchase for specific parts.

What is the length and diameter of the inner barrel?

113 mm internal barrel with a 6.02 mm diameter for a stable trajectory and optimized accuracy.

What advice is there for maintaining the GBB?

Lubricate the cylinder head and seals, check the valve seals, clean the inner barrel and adjust the gas to the ambient temperature to maintain performance and reliability.
