GBB Hi-Capa with a racing look: openwork slide, threaded bronze barrel and 30-round magazine.

Gas Blowback Hi-Capa 6 replica combining aggressive design, Hi-Capa compatibility and field equipment.

- **Operation** : Gas Blowback (GBB).
- **Internal barrel** : 100 mm Ø 6.02 mm.
- **Construction** : combination of metal and polymer for robustness and lightness.
- **Firing modes** : Safe / Semi.
- **Hop-Up** : adjustable to optimize accuracy.
- **Magazine capacity** : 30 BBs.
- **External barrel** : 11 mm threaded, bronze finish (compatible with compensator/silencer with adapter).
- **Ergonomics** : textured grip, openwork cylinder head, fiber optic handlebar.
- **Included** : carrying case and speedloader.
- **Compatibility** : Many Tokyo Marui Hi-Capa parts are compatible.

The Hi-Capa 6 Golden Eagle boasts a bold silhouette and race-ready finish while offering a technical base compatible with the Hi-Capa ecosystem.

Construction and finishing

The combination of a skeletonized metal slide and a polymer frame ensures a good balance between feel and weight. The bronze outer barrel, threaded 11mm, allows for the installation of aesthetic or functional accessories. The details (skeletonized slide, indexing grooves, fiber optic front sight) enhance the visual identity while remaining practical during gameplay.

Performance and precision

Equipped with a **100mm Ø 6.02mm inner barrel** and an **adjustable hop-up** , the Hi-Capa 6 aims for a stable trajectory and increased accuracy at medium range. The gas blowback system delivers a realistic recoil sensation suitable for field sessions and recreational competitions.

Ergonomics and field use

The textured grip provides excellent handling even in wet conditions, the 30-round magazine reduces reloading frequency, and the bottom rail accepts lights or lasers. The included case makes transporting and protecting the replica easy between games.

Interview and recommendations

Regularly lubricate the breech and seals, check the valve seals, and use a lubricating gas appropriate for the temperature to ensure consistent performance and longevity. Clean the inner barrel after heavy use and use high-quality BBs to maintain accuracy and components.

FAQ - Questions/Answers

Is the gun delivered ready to use?

The replica comes in a case with a 30 BB magazine and a speedloader; you will need to provide GBB compatible gas and BBs for setup.

Does the threaded barrel accept a compensator or a silencer?

Yes, the outer barrel is threaded 11 mm; depending on the accessory, an adapter may be required for some compensator or silencer models.

Which parts are compatible with this Hi-Capa?

Many Tokyo Marui Hi-Capa parts are compatible (inner barrels, springs, valves, magazines) but check the part number before purchase for specific parts.

What is the length and diameter of the inner barrel?

100mm internal barrel with a 6.02mm diameter for a stable trajectory and good accuracy.

Does this GBB require a specific type of gas?

Use a gas suitable for GBBs, preferably lubricated; adjust the reference according to the ambient temperature to maintain pressure and regularity.
