GBB Hi-Capa with a racing look: openwork slide, threaded bronze barrel and 30-round magazine.

Gas Blowback Hi-Capa 6 replica designed for players seeking a compromise between racing aesthetics and technical compatibility.

- **Operation** : Gas Blowback (GBB).
- **Internal barrel** : 100 mm Ø 6.02 mm.
- **Construction** : combination of metal and polymer for robustness and lightness.
- **Modes** : Safe / Semi.
- **Hop-Up** : adjustable to optimize accuracy.
- **Magazine capacity** : 30 BBs.
- **External barrel** : 11 mm threaded, bronze finish.
- **Ergonomics** : textured grip, fiber optic handlebar, vented cylinder head.
- **Included** : carrying case and speedloader.
- **Compatibility** : Many Tokyo Marui parts are compatible.

The Hi-Capa 6 Golden Eagle combines a skeletonized slide with a bold style and a threaded bronze outer barrel for a distinctive visual appearance while remaining compatible with the Hi-Capa ecosystem.

Construction and finishing

The replica combines metal components for the slide and a polymer frame designed to minimize weight. The ported slide and bronze outer barrel provide a sporty look and allow for the mounting of a compensator or suppressor thanks to the 11mm threading. The overall finish is designed for durability under heavy use while offering a modern grip.

Performance and hop-up

Equipped with a 100mm Ø 6.02mm inner barrel and an adjustable hop-up, this replica is designed for stable trajectory and increased accuracy at medium range. The gas blowback system provides a realistic recoil sensation suitable for field use or recreational competition.

Ergonomics and accessories

The textured grip improves traction even in wet conditions, the fiber optic front sight facilitates target acquisition, and the 30-round magazine reduces reloading frequency. The lower rail allows for the addition of a light or laser, and the included carrying case ensures secure transport.

Interview and recommendations

For optimal longevity, regularly lubricate the breech and seals, check the valve seals, and use a lubricating gas appropriate for the temperature. Clean the inner barrel after heavy use and use high-quality BBs to maintain accuracy.

FAQ - Questions/Answers

Is the gun delivered ready to use?

The replica comes in a case with a 30 BB magazine and a speedloader; gas and BBs are required for operation.

Is the barrel threaded and compatible with accessories?

Yes, the outer barrel is threaded 11mm and can accept compensator or adapter depending on your needs.

Which parts are compatible?

Many Tokyo Marui Hi-Capa parts are compatible, making internal and external upgrades easy.

What is the length and diameter of the inner barrel?

100mm internal barrel with a diameter of 6.02mm for a stable trajectory and good accuracy.

Does this GBB require a specific type of gas?

Use a gas suitable for GBBs, preferably lubricated, and adapt the choice according to the ambient temperature to maintain pressure and regularity.
