An essential accessory for precise and safe reloading with black powder!

Designed for the most demanding black powder shooters, the Pedersoli Ø7 mm brass loading funnel is ideal for reloading traditional rifles from .44 to .58 caliber. Its conical shape and fine manufacturing allow for a smooth and precise transfer of black powder into the chamber, without loss or overflow.

The Ø7 mm funnel is an essential part for all black powder shooting enthusiasts, whether they are competitors, reenactors or antique weapons enthusiasts.
Its robust turned brass design provides excellent support along the barrel axis while avoiding static discharges (risk reduced by the absence of synthetic materials).

Its base is suitable for common calibers of flintlock or percussion rifles, including Pedersoli models such as the **Hawken** , **Rocky Mountain** , **Kodiak** or the **Rolling Block** series.
The funnel facilitates regular reloading and prevents clogging of the barrel, contributing to better shooting consistency and the longevity of your weapon.

- **Material** : Solid turned brass
- **Mouthpiece diameter** : 7 mm
- **Caliber compatibility** : .44, .45, .50, .54, .58
- **Use** : Black powder rifles (percussion, flint)
