CPG1120	Gas charger for HI-CAPA 5.1 Golden Eagle	Vente libre	6 mm airsoft	25	330	Black	Gas	21.00 € incl. tax

25-shot metal magazine compatible with Golden Eagle and Tokyo Marui, reliable and robust.

Gas magazine designed for **Golden Eagle Hi-Capa 5.1** replicas. Compact, robust, and easy to refill, it ensures a smooth and consistent gas supply during gameplay.

- **Type** : gas charger (Green Gas).
- **Compatibility** : Golden Eagle, Tokyo Marui, Army Armament.
- **Capacity** : 25 BBs (6 mm airsoft).
- **Construction** : metal body with heel-filling valve.
- **Length** : 136 mm.
- **Weight** : 330 g.
- **Colour** : black.
- **Caliber** : 6 mm airsoft.

Essential for any Hi-Capa player, this **Golden Eagle** gas magazine combines robustness and ease of maintenance. Its 25-round capacity offers a good compromise between autonomy and realism.

The metal construction ensures excellent impact resistance and improved thermal inertia, optimizing gas pressure during firing. Refilling is easy via the base, using an adapter or speedloader (recommended for BBs).

Compatibility and maintenance

Compatible with **Hi-Capa 5.1** Golden Eagle, Tokyo Marui, and Army Armament replicas, this magazine is a reliable choice for GBB enthusiasts. Use **lubricated gas** to preserve the seals and ensure good pressure retention, especially in cold conditions.

Usage tips

Fill the magazine through the valve located at the base, holding it upright for 4 to 6 seconds depending on the temperature. Do not overfill the reservoir and store the magazine slightly pressurized to preserve the internal seals.

FAQ - Questions/Answers

Is this charger compatible with other brands?

Yes, it is compatible with the Hi-Capa 5.1 models from **Golden Eagle** , **Tokyo Marui** and **Army Armament** .

Which gas should be used?

Use a good quality **Green Gas** type gas, ideally lubricated, to preserve the seals and maintain stable pressure.

Does it require an accessory to recharge?

A speedloader is recommended to facilitate filling with balls and prevent blockages.

Can it be used in winter?

Yes, but it is advisable to use a more powerful gas or to keep the charger warm before use in order to limit pressure loss.
