- **Contents:** 8 × 500 g
- **Packaging:** Plastic bottle with dispensing nozzle
- **Origin:** Made in France
- **Use:** All year round

A high-performance liquid attractant for all-year use

Blackvit Vitex is a wild boar attractant made from **vegetable tar** . Its particularly fluid formulation retains its full effectiveness regardless of the season, making it easy to apply in both warm weather and winter.

Simple application on trees and mudflats

Thanks to its dispenser nozzle, **Blackvit** is easily applied along a tree trunk, starting about one meter above the ground so that the product flows naturally. It can also be poured directly into an existing wallow to enhance its attractiveness.

A formula based on vegetable tar

Vegetable tar diffuses its scent for a long time and helps attract wild boar to frequented areas. Its fluid texture allows for even distribution on the surface while simplifying the maintenance of the

feeding stations.

Packaging suitable for professionals

This product is sold in **cartons of 8 x 500g bottles** . This packaging is ideal for retailers, hunting associations and land managers looking for a practical and economical stock.

FAQ

How to apply Blackvit?

The product is applied to a tree trunk from about one meter above the ground to allow the liquid to drain away, or directly into an existing wallow.

Can it be used all year round?

Yes. Its fluid formulation based on vegetable tar allows for effective use regardless of the season.

Does this reference correspond to a bottle or a carton?

This reference corresponds to a **carton of 8 bottles of 500g** .
