The essential Ultrair gas now with silicone gun lubricant

Expected pressure of 135 psi, optimal green gas for GBB and GBBR airsoft guns in spring, summer, and early autumn. Tested at 5°C, 10°C, 15°C, 20°C, and 30°C; results chart on the cylinder.

Part of ASG's new Ultrair Power Gas range, this is the same gas as the classic Ultrair, just as effective, but now with added silicone - so with every shot, your gun receives the lubrication it needs.

With an expected pressure of 135 psi ***** , this green gas is intended for use in spring, summer and early autumn and is suitable for a wide range of GBB and GBBR airsoft guns.

Like all our new Power Gas products, this product has been tested at a target temperature of 25°C/77°F.

Also tested at 5°C, 10°C, 15°C, 20°C and 30°C, you will find the results on the back of the bottle in a handy temperature and pressure chart. This will help you choose the right gas for your replica and the weather conditions.

When you want a versatile green gas for year-round play (especially in spring, summer, and early fall), then ASG's Ultrair Airsoft Power Gas 135 psi is a must-have for the GBBs in your collection.

***Tested at 25°C/77°F**

Features:

- 570 ml bottle
- 135 psi*

- Constant gas level throughout the year (especially in spring, summer and early autumn)
- Contains silicone for internal lubrication
- Durable metal nozzle
