M249 GBBR VFC Replica

<https://europarm.fr/en/produit-20831-M249-GBBR-VFC-Replica>

NEW

| SKU | Designation | French Law | Shots | Length (cm) | Weight (g) | Airsoft Type | MSRP |
|--------|-------------------|-------------|-------|-------------|------------|--------------|---------------------|
| LG4023 | REP GBBR VFC M249 | Vente libre | 100 | 100 | 3800 | Gas | 1030.00 € incl. tax |

VFC positioned the M249GBBR as the world's first mass-produced, functional GBB machine gun. It not only improved its lightweight but also added numerous innovations, including a new BB and gas feed system. This allows players to fully enjoy the game and discover many practical features.

Features:

- Length 1009 mm
- 360mm internal barrel
- Weight: 3800g
- Capacity 100 BBs

■ Easy HOP-UP adjustment

To allow users to directly adjust the HOP-UP system on the airsoft battlefield, VFC has developed a simplified adjustment method. The HOP-UP system can be adjusted directly on the M249 body, without having to open the slide or receiver cover. A simple 2 mm Allen key is all that is needed to make adjustments on the fly!

■ The M249 Look respected

VFC in overall design, material, function, appearance, as well as engraving, which fully reproduce the American military style M249.

■ Aluminum alloy design for unprecedented lightness

The main structure of VFC's M249 GBBR is made of aluminum alloy, which significantly reduces the overall weight. The weight drops from nearly 10 kg (with an all-steel construction) to approximately 4 kg thanks to VFC's aluminum design. Inside, all key components are still made of steel, preserving durability where it matters most! This design not only reduces weight, but also preserves the structural strength of the M249 platform.

■ New GBBR system designed

The new GBB system is divided into two categories: BBs and gas supply. BBs can be reloaded via this dedicated plastic magazine. Gas supply can be provided by the 5.56 magazine or by an amobox. This system offers greater gas autonomy. In addition, the new gas pressure regulating valve has been updated for more precise adjustment of the output pressure, thus improving shooting stability.
