Smooth, jam-free ejection for your progressive press.

The **Lee Pro 4000 Auto Breech Lock Pro Case Ejector** is a genuine replacement part designed to ensure smooth and efficient ejection of empty cases on your **Lee Pro 4000** or **Auto Breech Lock Pro** press. This ejector guides the case off the rotary plate at the end of the cycle, ensuring a smooth and uninterrupted production flow. Easy to install, it replaces a worn or missing part and extends the reliability of your progressive press. A simple solution to maintain optimal output and avoid jamming during reloading.

The Lee Precision **Case Retainer** for **Pro 4000 Auto Breech Lock Pro** is designed to hold **cases** securely in place during the reloading cycle.

An essential part for your progressive press

The **Case Retainer** guides the case between each position, ensuring a stable and precise position to prevent jamming or tipping.

Two versions adapted to your needs

- **Short version (PR3691B)** : ideal for short cases or specific stations.
- **Long version (PR3691C)** : recommended for longer cases, for a firm hold throughout the cycle.

Genuine Lee part, easy installation

An official **Lee Precision** part, the **Case Retainer** is easily replaced, without complex disassembly, to restore proper operation of your press.

Full technical specifications
