- **Detection angle:** 60°
- **Detection range:** 20 m
- **Infrared flash:** invisible, 940 nm, range 20 m
- **Trigger time:** 0.3 seconds
- **Storage:** 32GB micro SD card included (max 256GB)
- **Power supply:** 4 AA batteries included (alkaline or Ni-MH)
- **Protection:** IP65 waterproof
- **Dimensions:** 110 x 90 x 42 mm
- **Weight:** 237 g (with batteries)

An all-in-one solution, ready to capture

Whether you're a naturalist, trapper, or simply curious about wildlife, this complete **PIE1075** kit is designed to save you time. With **batteries and a memory card included** , no complicated setup is required. Simply select a mode using the 3-position selector (photo, video, mixed), and you're good to go.

Clear images and sound-enhanced videos

The photo mode captures two **8-megapixel images** per motion detection, while the video mode records a 10-second **Full HD clip** with audio. The hybrid mode combines both. As a result, you won't miss a thing, from discreet wildlife movements to suspicious intrusions.

Fast and accurate PIR sensor

Its **motion sensor** covers a 60° angle and triggers in just 0.3 seconds. With a range of **20 meters** , it offers an excellent balance between coverage and accuracy, for optimal use on trails or passageways.

Night vision without alert

Thanks to its **invisible infrared flash** (2 high-intensity LEDs at 940 nm), the device captures images at night without emitting visible light. This avoids disturbing animals and ensures discretion in all circumstances.

Robust and discreet design

With its **compact dimensions** (110 x 90 x 42 mm), **light weight** , and **forest camouflage** , the PIE1075 is easy to install and remains discreet. Its IP65-rated waterproof housing ensures optimal weather resistance.

Generous storage and easy transfer

The included **32GB microSD card** provides ample storage space. The card reader or **USB cable** allows for easy file retrieval (JPEG and MP4 formats).

Dual power source

Operates on 4 AA batteries (included), but can also be powered by **a solar panel** or **mains adapter** (6V/1.5A) for extended battery life. A valuable option for long exposures or remote locations.

Quick and screenless installation

No interface to manipulate: everything is designed for efficiency. The ideal installation is at a height of **1.5 m to 2 m** , slightly inclined downwards, facing north or south. The trap operates independently, day and night.

FAQ

Is this camera trap ready to use?

Yes, the pack contains everything you need: a 32GB memory card, 4 AA batteries, a strap, a USB cable, and a guide. No adjustments are necessary.

Can it be used for long-term monitoring?

Yes, thanks to compatibility with an external power supply (6V/1.5A) such as a solar panel or mains socket.

How do I transfer the files?

Photos and videos can be transferred via the supplied USB cable or micro SD card reader (JPEG/MP4 formats).
