Ready to use, simple and discreet to capture every move.

An ultra-compact camera trap that comes ready to use with batteries and an SD card. Ideal for capturing wildlife discreetly, without the need for complex setup.

- **3 preset modes:** photo, video, photo + video
- **Resolution:** 8 MP photo / Full HD video with audio
- **PIR detection:** 60° angle, 20m range
- **Invisible IR Flash:** 940nm LED, 20m range

A ready-to-use camera trap, designed for efficiency

This complete package includes everything you need: **PIE1075, 4 AA batteries, and a 32GB SD card**. No settings required: simply choose a mode using the 3-position selector and you're ready to go. Ideal for beginners and advanced users alike.

3 preset modes to capture every passage

Photo mode takes two 8 MP shots per trigger. **Video mode** records a 10-second Full HD sequence with sound. **Mixed mode** combines the two: 1 photo + 1 video for each detection.

Accurate and responsive PIR sensor

The **motion sensor** triggers the device in 0.3 seconds within a 60° field, with a **detection range of up to 20 meters**. Ideal for tracking frequent animal passages or intrusions.

Completely invisible infrared flash

The two **high-intensity IR LEDs** emit at 940 nm, for **discreet nighttime captures** up to 20 m without alerting wildlife. Activation is automatic depending on ambient light.

Compact, robust and discreet

With its small dimensions (110 × 90 × 42 mm) and a weight of only 237 g with batteries, the PIE1075 can be easily attached to a tree thanks to its supplied strap. **IP65 waterproofing** ensures it is resistant to rain, dust and temperature variations.

Flexible storage and easy transfer

Compatible with **micro SD cards up to 256GB** (class 10 mini), it allows you to record long sessions. Images and videos are transferable via **the supplied USB cable or card reader**.

Dual source power supply

Operates on 4 AA batteries (included), alkaline or Ni-MH rechargeable. **External 6V power** is available via solar panel or mains for extended use.

Quick installation, intuitive use

No screens or menus to navigate: it's all ready to go. Position the camera between 1.5m and 2m high, face north or south to avoid triggering from the sun, and let it do the work.
