An ultra-realistic random reflection effect to attract pigeons.

The **MOJO Dove A Flicker** is a set of electronic decoys designed to simulate the light reflections of a group of doves in motion.

- **Type:** Spinning Wing Lures
- **Format:** Pack of 4 units
- **Operation:** Built-in random timer
- **Use:** Laying on the ground in dry fields
- **Battery life:** Up to 20 hours
- **Power Supply:** 3 AA batteries per unit (not included)

A concept that revolutionized waterfowl hunting

Inspired by the historical success of rotating wings for ducks, the **MOJO Dove A Flicker** applies this technology to **columbidae (doves, turtledoves and pigeons)** . By diffusing **random reflections** simulating the wingbeats of a moving group, it transforms your post into a real visual attraction for pigeons or turtledoves.

Natural visual effect to deceive vigilance

Each decoy is equipped with a programmable rotation system with **a random on/off timer** , to mimic the natural activity of a flock of pigeons landing or feeding. This asynchronous behavior avoids the overly regular mechanical effect and increases the chances of approaching at close range.

Designed for dry fields

The **MOJO Dove A Flicker** is designed to be **placed directly on the ground** , without support or fixing, in **dry open areas** such as agricultural wastelands or plains. Scatter the 4 modules in front of your station to considerably increase your attractiveness, even if the location is not ideal.

- **Number of modules:** 4 individual lures

- **Usage time:** Up to 20 hours
- **Power supply:** 3 AA batteries (not included)
- **Land Type:** Dry, Non-Flooded Areas
- **Visual effect:** Random rotating white/black flash
- **Technology:** Built-in timer for movement variation
