LYM292	4500 Lube Sizer #2745880	Vente libre	599.00 € incl. tax

Lubrication and calibration of projectiles in a single step.

The **Lyman 4500 Lube Sizer** lubricates and sizes your lead projectiles in one smooth operation. Robust and precise, it delivers consistent, professional results, even with large calibers.

- **Type:** Greasing and recalibrating press
- **Structure:** monolithic steel
- **Compatibility:** H&I and Top Punch Lyman matrices
- **Heating:** Optional
- **Weight:** 3.6 kg without heating
- **Accessories:** Gas Check Seater included

A complete system for calibrating and greasing in a single operation

The **Lyman 4500 Lube Sizer** is the ideal tool for reloaders looking for a simple and effective solution to **lubricate** and **resize their lead bullets** . It combines two essential reloading operations in a single movement, guaranteeing a consistent and perfectly centered result.

Robust structure and enhanced ergonomics

Its **one-piece steel** construction ensures stability and longevity, even under heavy use. The **extended lever** provides high torque, ideal for calibrating hard or large-caliber bullets, while reducing user fatigue.

Fully compatible with Lyman accessories

This press accepts all **H&I dies** as well as standard **Top Punch** dies. It also comes with a **Gas Check Seater** to perfectly seat the base cups onto the projectiles, ensuring optimal alignment and a professional finish.

Usable with or without heating

The 4500 model can be equipped with a **heating element** . Heating facilitates the circulation of hard lubricants, especially in cold weather, and ensures even distribution across the entire bale. Use without heating remains possible with softer lubricants.

Why calibrate and grease your bullets?

Resizing ensures a **consistent diameter** and **perfect projectile stability** in the barrel. Lubrication, meanwhile, reduces friction and prevents lead fouling at high velocities. The **Lube Sizer** combines

these two steps into one, guaranteeing perfectly finished, ready-to-fire projectiles.

FAQ

- **Is heating included?** No, the heating element is optional depending on the version.
- **Which dies are compatible?** All **H&I** dies and standard Lyman **Top Punch** tips.
- **What is the purpose of the Gas Check Seater?** It allows the metal cups to be crimped to the base of the bullets for better accuracy and protection against hot gases.
