Clean up to 350 cases in a single cycle with built-in sieve.

The **Lyman Turbo 1200 Pro Tumbler** efficiently cleans up to 350 cases by vibration, with an **integrated sieve** to separate the cases from the media. Compact and robust, it is ideal for demanding reloaders.

- **Capacity:** up to 350 cases
- **Media volume:** 900 g (2 pounds)
- **Power supply:** 220V - French plug
- **Integrated sieve:** for quick separation of the sockets
- **Design:** streamlined base with internal agitators

A compact and powerful tumbler for demanding reloaders

Designed to meet the needs of **regular reloaders** , the **Lyman Turbo 1200 Pro** offers fast and consistent cleaning of metallic cases. With a capacity of **350 cases** per cycle and a compact design, it is ideal for individual or semi-professional workshops.

A design conceived for efficiency

Its **streamlined base** incorporates **agitators** that promote constant mixing of the media. **Anti-rotation blocks** stabilize the unit during operation, reducing unwanted vibrations and noise. The result? More consistent and quieter cleaning.

Easy separation thanks to the integrated sieve

No need to invest in an additional accessory: the **integrated sieve** in the lid allows for quick separation of the cases from the media once the cycle is complete. This saves valuable time and is another step towards a more streamlined workstation.

Compatible with European standards

This model is designed for a **220V power supply** with a **French plug** and is ready to use without an adapter. It accepts up to **900g of media** and effectively cleans all types of sockets, depending on their level of soiling and the media used.

A sustainable and cost-effective tool

For sport shooters and reloaders looking to **extend the life of their cases** , the Turbo 1200 Pro Tumbler is a reliable choice. It offers **effortless mechanical cleaning** , improves reloading consistency, and integrates seamlessly into any preparation line.

FAQ

- **How many cases can it process?** Up to 350 cases per cycle, depending on their size.
- **Does it come with media?** No, cleaning media must be purchased separately.
- **Do you need a separator for the nozzles?** No, the sieve is integrated into the lid.
