High-end AR10 rifle for long-range shooting, accurate, smooth and durable.

A robust and balanced **AR10 platform** , designed for precision and consistency.

- **caliber:** .308 Winchester
- **barrel length:** 16"
- **barrel profile:** Heavy black nitride
- **no scratch:** 1:10
- **thread:** 5/8x24
- **Muzzle brake:** Dragon Slay-AR CMB (PVD treatment)
- **handguard:** M-LOK 15"
- **materials:** lower and upper in CNC machined 7075-T6 aluminum
- **relaxation:** HYPERFIRE EDT2 Heavy Gunner Single Stage
- **cylinder head:** DURABOLT PVD treatment
- **selector and lever:** ambidextrous
- **stock and handle:** B5 SYSTEM
- **charger supplied:** 10 shots
- **delivery:** hard case

The **WATCHTOWER Type HSP-H** is a precision semi-automatic rifle based on the AR10 platform, designed for shooters seeking the perfect balance between power and comfort. With its 16-inch barrel with a "heavy" profile and its short-travel HYPERFIRE trigger, it is intended for both medium-range precision shooting and rapid-fire shooting on the range.

Accuracy and consistency of shooting

The 16-inch **Heavy Black Nitride** barrel, with 1:10 rifled spacing, ensures optimal stabilization of .308 Winchester projectiles. This treatment gives the metal increased hardness and exceptional resistance to erosion, ensuring long-term consistency. Accuracy is enhanced by the crisp, direct

HYPERFIRE EDT2 trigger, offering predictable firing and minimal reset.

Ergonomics and comfort

The telescopic **B5 SYSTEM** stock allows for quick adjustment to the shooter's body shape, while the same manufacturer's grip ensures a firm, natural grip. These elements promote a stable posture and better recoil control. The ambidextrous selector and cocking lever allow for smooth operation for all shooters.

Construction and mechanical fluidity

The **lower** and **upper** assembly are CNC-machined from 7075-T6 aircraft aluminum, renowned for its superior strength-to-weight ratio. The PVD-coated **DURABOLT** cylinder head assembly provides a silky-smooth ride, reducing clogging and facilitating maintenance, even after extended sessions.

Surface technologies and treatments

PVD treatment (Physical Vapor Deposition)

PVD deposits a thin metallic layer on parts, improving hardness and corrosion resistance. It creates an extremely smooth surface, reducing fouling and making cleaning easier-a key benefit for intensive shooters.

Black Nitride

Black nitride treatment strengthens the steel surface by incorporating nitrogen, increasing wear and heat resistance. This process ensures increased barrel longevity and a sleek satin black finish.

Dragon Slay-AR CMB Muzzle Brake

The **Dragon Slay-AR CMB muzzle brake** limits barrel lift and reduces recoil, allowing for quick return to sight. Its PVD coating improves its durability and heat resistance.

HYPERFIRE EDT2 Heavy Gunner Trigger

The **HYPERFIRE EDT2 single-stage trigger** delivers a crisp, predictable release. Its short travel and short reset allow for more precise shot sequences, ideal for dynamic shooting or repeated precision.

- **total length:** variable depending on stock position
- **no scratch:** 1:10
- **Aluminum Type:** 7075-T6 CNC Machined
- **surface treatment:** PVD graphite / black nitride
- **barrel thread:** 5/8x24
- **handguard compatibility:** M-LOK 15"
