Ultimate duck flight realism with a quiet motor and revolutionary design.

The **MOJO King Mallard** revolutionizes the concept of the **spinning duck** thanks to a completely redesigned internal structure.

- **Motorized system** integrated into a rigid supporting frame
- **Rechargeable 6V Li-ion battery** included + charger
- **Direct connection** between wings and support rod

MOJO King Mallard Elite Series: The Next Generation Spinning Duck

The **MOJO® Elite Series™ King Mallard** is more than just a **motorized waterfowl** decoy. It redefines the standard for **spinning ducks** with a completely redesigned design. Unlike conventional models where the motor is mounted inside the hollow body, here everything rests on a **central support frame** that ensures **perfect alignment** and maximum stability.

- **Less vibration, more silence** : perfect for sensitive areas
- **Flexible and removable body** : easy storage and transport
- **6V Li-ion battery** with charger supplied for optimized autonomy
- **Lightweight design** : easier to handle and faster to install

This patented system allows the rotating wings to attach directly to the rod, without support from the body, which significantly reduces noise and improves the visual effect for the ducks in flight. The **rotation is smoother** , faster, and more realistic.

With its soft skin, rechargeable power supply and ease of maintenance, the **MOJO King Mallard** stands out as the **best motorized duck** for demanding hunters.

Make your stations irresistible to ducks with **MOJO® Elite Series™** technology.
