A90220	Anti Blast Qd Strike Indus Compensator. Compatible Fdb A2 5.56/9mm	Vente libre	6.2	40	259	230.00 € incl. tax

Reduce the blast of your AR15 in an instant with this quick-mount compensator.

Designed to fit in a snap onto a standard A2 flash hider, this QD compensator from **STRIKE INDUSTRIES** reduces flash and recoil without changing the original muzzle brake.

- **Mounting:** quick bayonet fitting with fork locking
- **Compatibility:** A2 flash hider (cal. 5.56 / 9mm)
- **Material:** Heavy-duty machined steel
- **Weight:** 259 g (9.15 oz)
- **Length:** 6.2 cm

Conceived as a natural evolution of the A2 flash hider, this compensator is aimed at shooters concerned about their comfort, without having to change their weapon or threading.

Quick and secure installation

Thanks to its bayonet and **locking ring** system, assembly takes only seconds, requires no tools, and remains perfectly stable once locked. The **safety fork** prevents any accidental loosening, even in case of imperfect tension.

Reduced blast at close range

In enclosed shooting ranges or during close-quarters shooting, the effects of side blast can be unpleasant, even disruptive, for nearby shooters. The **Strike A2 Blast Shield** channels the gases forward, limiting side blast and flash. This improves **visual discretion** and acoustic comfort.

A2 Flame Shroud Storage

No need to disassemble or change the flash hider: this **compensator** attaches directly to the **A2 Birdcage**, a NATO standard widely used on **AR15s** and **AR9s**. A real advantage for armories and law enforcement

agencies equipped with older models.

Versatility in 5.56 and 9mm

The design was conceived to be compatible with the two most common calibers on modern tactical platforms. It fits both an **AR15** in 5.56x45 and an **AR9** in 9mm equipped with a Birdcage of the same standard.

FAQ

- **Is this compensator compatible with all A2 flame hidere?**

Yes, it is designed for standard 5.56 and 9mm models in NATO Birdcage format.

- **Is the assembly reversible?**

Yes, the QD system allows for quick assembly and disassembly without altering the threads or the flame cover.

- **Can it be used on an AR10?**

It can be mounted on an AR10 equipped with a standard Birdcage A2, but is not optimized for calibers larger than 9mm.
