SKU	Designation	French Law	Shots	Length (cm)	Weight (g)	Airsoft Type	MSRP
LE9071	AEG LT L119A2 GEN4 AMBIDEXTRE TAN	Vente libre	120	70	3175	Electrical	329.00 € incl. tax

A modern, responsive and all-metal replica, designed for tactical performance.

This L119A2 GEN4 version from **Lancer Tactical** stands out as a high-performance AEG replica, combining robustness, responsiveness and modularity thanks to its full metal construction and optimized electronics.

- **Full metal body** for excellent durability in the field
- **10-inch handguard** with Picatinny rails and **M-LOK** interfaces
- **Reinforced gearbox** with 16:1 steel gears
- High-torque, fast-cycle, and responsive **NEO 25K motor**
- **Nebula 2 MOSFET** with optical sensor and advanced programming
- **Internal 245mm/6.03 barrel** for good accuracy and a stable trajectory
- **Adjustable Delta stock** with QD sling attachment
- **T-Dean connector** for optimal electrical transmission
- **120-round mid-cap magazine** included
- **Battery not included** - recommended: 11.1V LiPo
- **Black flame hider**

The Lancer Tactical L119A2 GEN4 Full Metal Tan is designed for players seeking a responsive, robust replica ready for modern tactical setups. Its sandblasted finish, metal body, and M-LOK handguard make it a versatile platform suitable for a variety of play styles.

With its Nebula 2 electronics and high-responsive motor, the replica ensures a regular rate of fire and a smooth cycle in all circumstances.

Full metal construction and modern ergonomics

The metal body provides a robust and consistent feel, inspiring immediate confidence from the moment you pick it up. The adjustable Delta stock offers a stable and comfortable grip, while the M-LOK and Picatinny interfaces allow you to add lights, grips, optics, or tactical accessories as needed. The result is a well-balanced replica that's pleasant to handle, even in tight spaces.

Reinforced mechanics for greater shooting consistency

The 16:1 steel gears and reinforced gearbox ensure smooth cycling and excellent mechanical reliability. The NEO 25K motor delivers crisp, responsive firing, ideal for quick retreats or dynamic engagements. The stock 245mm 6.03 inner barrel improves accuracy and stabilizes trajectory, contributing to effective range.

Nebula 2 electronics and intuitive programming

The Nebula 2 MOSFET, equipped with an optical sensor, allows for easy customization of firing modes, improved electrical communication, and optimized internal durability. This modern electronics ensures smooth, stable operation and protects the mechanical components.

FAQ

Is the replica made entirely of metal?

Yes, the body is full metal, for increased strength and superior realism.

Is the handguard M-LOK compatible?

Yes, the 10-inch handguard combines M-LOK and Picatinny, allowing for complete customization.

Is the battery included?

No, you need to provide an 11.1V LiPo battery with T-Dean connector for optimal operation.

Is the MOSFET programmable?

Yes, the Nebula 2 allows for simple adjustments to shooting modes and improves overall responsiveness.

Is the replica suitable for outdoor play as well as CQB?

Yes, its compact size, consistent useful range and responsiveness make it a versatile choice.
