HN PLOMB EXCITE PLINKING 4,5 BTE/500

https://europarm.fr/en/produit-21139-HN-PLOMB-EXCITE-PLINKING-4-5-BTE-500

SKU	Designation	French Law	Caliber	Projectile	Pack.	Grams	MSRP
PB315	HN PLOMB EXCITE PLINKING 4,5 BTE/500	D	.177 (4.5 mm)	Diabolo	500	0.47	8.00 € incl. tax

Ballistic characteristics and flight behavior

The diabolo shape combined with a **grooved skirt** promotes pressure buildup in the barrel and improves aerodynamic stability at short distances. In practice, this translates into consistent groupings on targets at 10 meters with CO? replicas or recreational rifles.

Design and finish

Made from calibrated **lead alloy** , each pellet features a machined skirt to optimize sealing and limit dispersion. The finish protects the surface against micro-defects that would impair shot repeatability.

Usage tips

For optimal performance: use clean ammunition, control the weapon's power (? 3.5 J recommended), and limit extended sessions without cleaning the barrel. Ideal for beginners, plinking, and target practice up to 10 m.

Maintenance and storage

Store in a dry place, away from moisture and temperature fluctuations. Avoid prolonged contact with corrosive surfaces. Clean the barrel regularly to maintain the accuracy and longevity of the firearm.

FAQ

- **Q: Are these pellets suitable for my CO? pistol?**
  Yes, they are suitable for the majority of CO?/compressed air pistols and rifles that meet the recommended power levels (? 3.5 J).
- **Q: Is it possible to shoot beyond 10m?**
  Beyond 10m the trajectory and energy decrease; these pellets remain usable but offer less regularity for long-range precision shooting.
- **Q: Which box should I choose for recurring use?**
  A box of 500 is a good compromise for regular practice; consider several boxes if you shoot frequently.
