Hot bath burnishing for antique and collector's weapons.

ARMISTOL Selabronze is a mixture of technical salts for hot tanning steels.

- **Type:** Hot tanning salts
- **Use:** Restoration of old weapons
- **Compatibility:** Conventional or low-alloy steels
- **Packaging:** 25 kg bucket
- **Composition:** Sodium hydroxide, sodium nitrite

A precision bath for a professional tan

Designed for **hot-bronzing antique** or **collector's** weapons, **Selabronze ARMISTOL** provides a uniform, strong and durable black finish on steel. It is used in meticulous restorations, in gunsmiths or specialist workshops.

Application by hot bath

This process requires a suitable installation: a heated **sheet metal tank** , large enough to accommodate the parts to be treated. A **heating ramp** is placed under the tank to raise the water temperature, triggering the browning reaction with the salt.

Highly effective technical formula

Its **composition** combines **sodium hydroxide** and **sodium nitrite** , elements recognized for their effectiveness in the heat treatment of metals. This mixture allows a uniform chemical reaction, guaranteeing a deep and aesthetic burnishing.

Recommended applications

- **Restoration:** ideal for **antique weapons** or collectible mechanical parts.
- **Compatibility:** Works on **mild or low alloy steels** .
- **Users:** gunsmith professionals, experienced collectors, restoration workshops.
