Precise and consistent priming thanks to a unique patented system.

A benchtop priming tool designed for demanding reloaders. Allows total control of priming depth with a smooth and precise side lever system.

- **Type:** Manual benchtop priming
- **Priming:** adjustable depth with cup stop
- **Control:** 90° side lever with helical cam
- **Compatibility:** all standard socket holders
- **Usage:** ambidextrous (left/right)
- **Patent:** US #11,713,950

When it comes to priming, consistency is key. **Lyman** 's **Accu-Prime** was designed to eliminate inaccuracies caused by variations in rim thickness, common in cases. Thanks to a patented system, this tool guarantees a **consistent priming depth** , cartridge after cartridge.

Patented cup system with direct stop

Unlike traditional systems that rely on the rim, the **Accu-Prime** uses a cup that acts as a stop, in contact with the **base of the case** . As a result, the primer is seated to a perfectly controlled depth, regardless of brass tolerances.

Fluid side lever with helical cam

The punch descent mechanism relies on a **helical cam** for a smooth and progressive stroke. The **90° lateral lever** ensures stable and jerk-free starting, whether you are right- or left-handed.

Universal compatibility and ease of use

The tool accepts all **standard cartridge cases** , whether Lyman or competitor brand. Its ambidextrous design allows for installation tailored to your preferences. The primer is manually inserted into the cup, ensuring **complete control** at every stage.

FAQ

- **Can socket holders from other brands be used?**
  Yes, the Accu-Prime is compatible with **all standard shellholders** .
- **Is the system adjustable for different types of primers?**
  Yes, the **priming depth** is fully adjustable to fit each cartridge.
- **Is it usable by a left-handed person?**
  Yes, the lever is **reversible** for left- or right-handed use.
