LYM273	.44 Mag #7832336	Vente libre	.44 Magnum (Rem)	54.00 € incl. tax

Total control of dimensions for reliable and safe ammunition.

A control gauge for pistol cartridges, designed to validate the **critical dimensions** of reloaded ammunition. An essential tool to guarantee safety, reliability, and compliance with standards.

- **Function:** checks the length, diameter and overall length
- **Type:** pistol ammunition
- **Precision:** high-tolerance machining
- **Use:** pre-storage or pre-competition check
- **Target audience:** reloaders, sport shooters, competitors

In reloading, every detail counts. **Lyman** 's **maximum pistol cartridge gauges** are designed to ensure that every round meets precise dimensional specifications. They are a quick and reliable checking tool, used both in the workshop and at the shooting range.

Socket length under control

An excessively long cartridge case can cause a chamber jam. This gauge allows you to **instantly check the ammunition length** according to the specifications of the caliber in question.

Diameter and circularity are compliant

The gauge also tests the **outside diameter** to ensure the case hasn't been deformed during resizing or seating. This is a simple way to prevent feeding errors.

Verified Overall Length (OAL)

The **overall cartridge length** is crucial for the proper functioning of the firearm. This gauge allows for quick verification that the ammunition conforms to CIP or SAAMI standards.

FAQ

- **Is this guarantee compatible with all calibers?**
  No, it is **specific to each caliber** . Make sure you order the correct model.
- **Should it be used for all types of ammunition?**
  Yes, it is particularly recommended for all types of **ammunition** or if you are unsure about the settings of your tools.
- **Does this pledge replace a micrometer?**
  No, it is **complementary** : it allows for global and rapid control, but does not provide a numerical value.
