.515 lead bullet with a wide flat side, ideal for antique weapons or replicas.

Lyman 515139 single-cavity **steel mold** designed for casting **.515"** lead bullets weighing **340 grains** . Perfect for reloading antique firearms such as Sharps or Springfields.

- **Bullet diameter:** .515"
- **Nominal weight:** 340 grains
- **Number of cavities:** 1 (single cavity)
- **Material:** High-precision machined steel
- **Bullet type:** ogival with grease grooves
- **Handle:** not included

The **Lyman 515139** single-cavity mold produces heavy projectiles with a **.515"** diameter and traditional profile. It is a benchmark among shooters and collectors equipped with antique or replica firearms in .50 caliber (such as 50-70, 50-90, etc.).

Heavy bullet for long-range shooting or increased power

With its **340 grains** , this bullet is suitable for moderate to heavy loads. Its **wide flat side** ensures good energy transfer and accurate target performance.

Traditional shape, wide grooves

The projectile features **deep lubrication grooves** , typical of bullets designed for black powder or substitutes. This ensures good lubrication and limits fouling of the barrel.

Precision machining, homogeneous molding

The mold is made of **hardened steel** , with clean lines and perfect alignment. Each cast bullet has a **consistent profile** , essential for safe reloading and consistent shooting.

FAQ

- **Is this mold compatible with all Lyman handles?**
  Yes, it is compatible with **standard Lyman single cavity handles** (sold separately).
- **What is the target caliber of this bullet?**
  Centerfire calibers in **.50"** such as the **50-70 Government** , the **50-90 Sharps** , etc.
- **Can this mold be used with black powder?**
  Yes, this projectile is **perfectly suited for reloading with black powder** or modern substitutes.
