LYM283	Ram Prime Die #7728040	Vente libre	79.00 € incl. tax

Precise manual priming on the press with total control.

Lyman Ram Prime press-mounted **priming tool** for **manual and progressive** priming of each case. Ideal for reloaders seeking control and precision.

- **Type:** Press primer (manual, 1 to 1)
- **Mounting:** Standard 7/8x14 thread
- **Use:** Controlled priming, case by case
- **Compatibility:** all standard presses (Lyman, RCBS, Hornady...)
- **Function:** Soft priming, no hand tools required

The **Ram Prime Die System** allows for **progressive priming** directly on your single-stage press. It offers an ideal alternative to manual primers for reloaders who want **optimal feel** when inserting the primer.

Sensitive and secure priming

Thanks to pressure exerted by the press lever, this system ensures **precise primer placement** , eliminating the risk of crushing or uneven insertion. The user feels each step, minimizing seating errors.

Universal installation on all presses

Threaded with a **7/8x14** thread, this system is compatible with all single-station presses on the market. It works with your standard shellholders (not included), regardless of the brand.

Simplicity and robustness

No complex mechanism: simply insert the case, position the primer in the shellholder, and operate the lever for precise and repeatable priming.

FAQ

- **Is a specific press required to use it?**
  No, it is **compatible with all standard 7/8x14 presses** .
- **Is it suitable for small and large primers?**
  Yes, depending on the **shellholder used** and the type of primer chosen.
- **What is the advantage compared to a manual primer?**
  More direct and stable feel via the press, and increased control of the compression.
